# WE ADD TECHNOLOGY WITH STYLE

*Graphic design*

And we respect the communication style  
based on the target audience

# WE TURN YOUR IDEAS INTO REALITY

*Cristina Galia*

We create for you, we  
offer our proposal  
but...

**WE KNOW NO LIMITS OF STYLE**

You can ask us for a  
style and we will make  
it for you

*We create digital experiences*

# IN THE LUXURY SECTOR

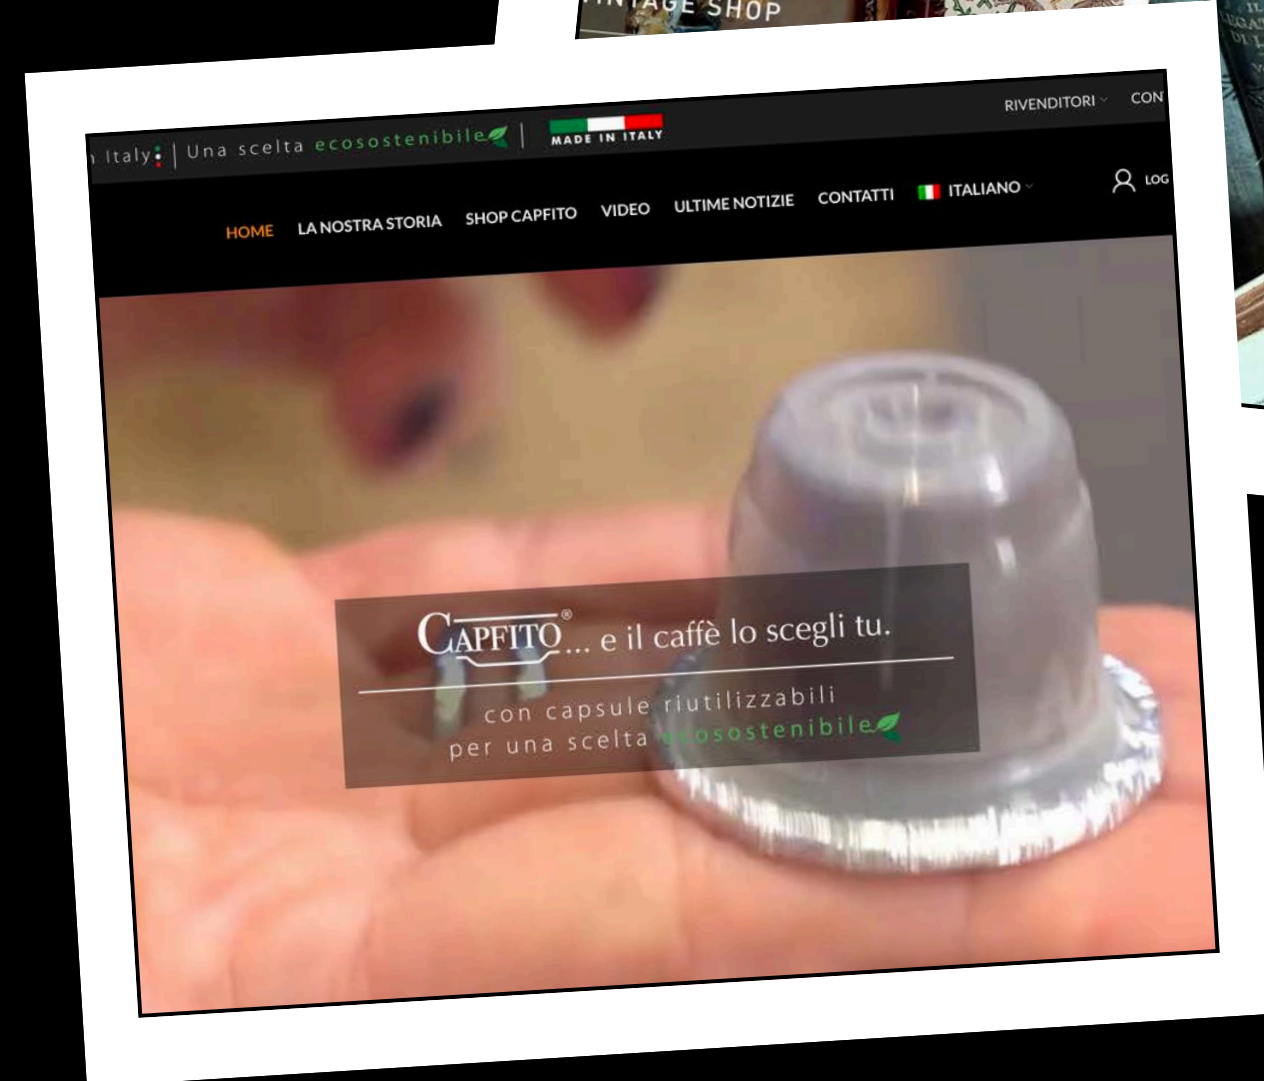

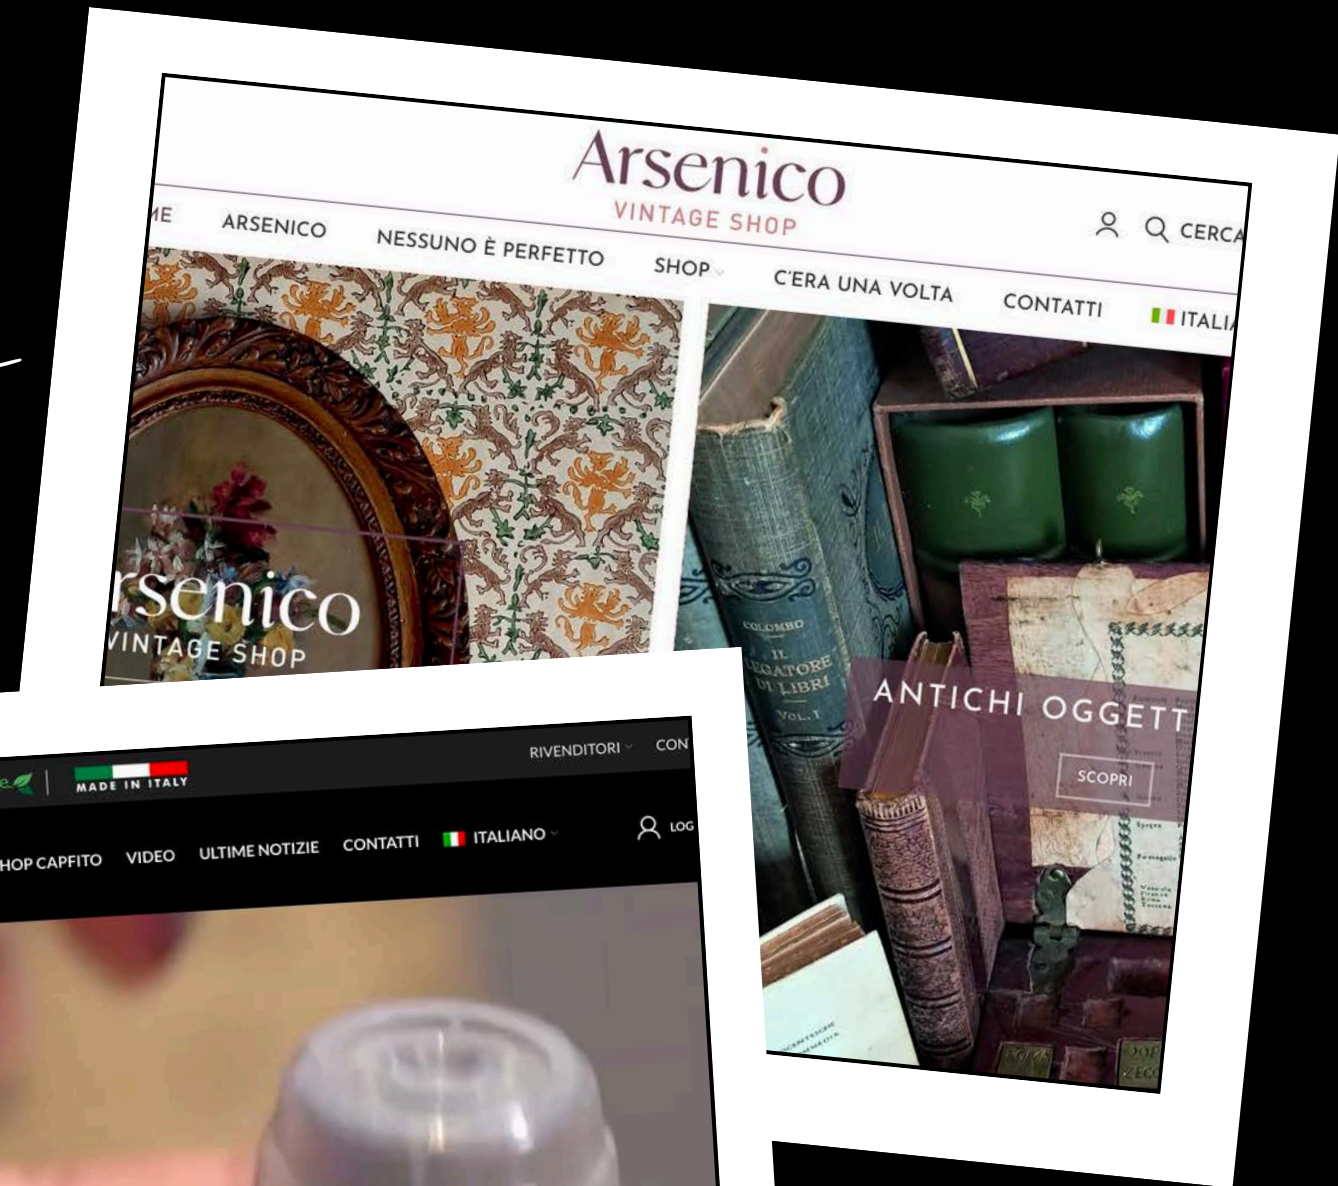

We add innovative experiences  
with style

*We create digital experiences*

# IN THE SME SECTOR

We offer SMEs a digital experience that reflects their brand identity with scalable package solutions.

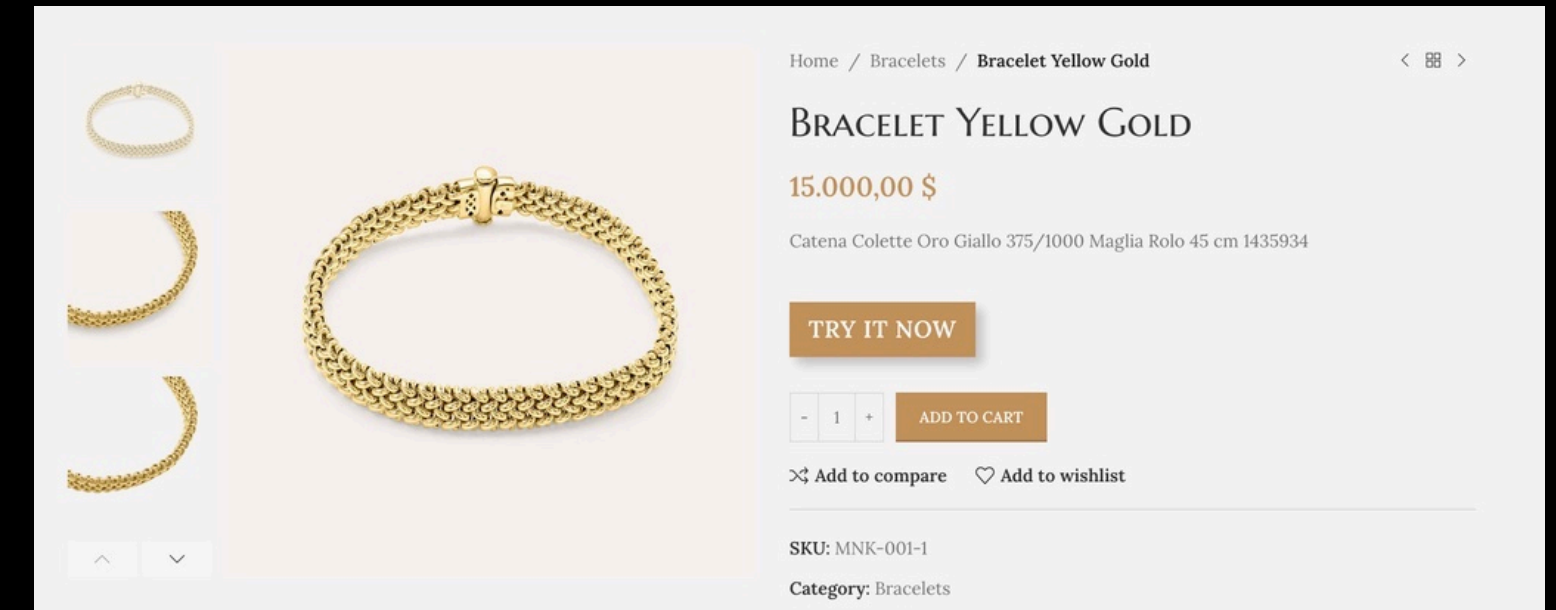

# *Luxury sector* **TRY IT NOW**

Immersive technology  
TRY IT NOW

We have created a system  
for the luxury world for  
jewelers to offer their  
customers the unique and  
immersive experience of  
wearing jewelry online

System can be integrated  
with new e-commerce  
sites/catalogs  
or existing websites

A tool capable of combining  
innovation and desire, making  
the digital shopping  
experience as exciting as the  
one in the boutique

# AI BEAUTY MAKE UP

Artificial intelligence integrated with the world of beauty makeup

We have created a system for the luxury beauty world to offer customers the unique experience of trying on makeup in advance.

System can be integrated with new or existing websites

A tool capable of anticipating desires, making the experience at the beauty center even more unique.

DEMO: <https://beauty.kriswa.com/request/makeup>

*Luxury sector*  
**AI BEAUTY HAIR**

Artificial intelligence  
integrated with the world of  
hair beauty

We have created a system  
for the luxury beauty world to  
offer customers the unique  
experience of trying out a  
haircut, hairstyle or color in  
advance.

System can be integrated  
with new or existing websites

A tool capable of anticipating  
desires, making the salon  
experience even more unique.

# *Tunes and* **APP MOBILE** *Luxury*

We're passionate about statistics and list apps, but we can create the app you want.

We'd love to create:

- Apps for business companies
- Apps for beach resort management
- Apps for sports
- Apps for parking management
- Apps for weddings
- Apps for queue management

*Jones and Langley*

WEBSITE MANAGEMENT

*We love to create*

# WEB APPLICATION

## APP FOR PRODUCTS FOR THE BUSINESS COMPANY

We thought to create an app where if you read a QR CODE you can check all things about this product.

Expiration date, allergens.

In this app can be implemented an fidelity card for the people: if the people photograph the receipt of a product that had buy the App can add a point and if you obtain point you can have a gift.

Each company might want an app like this and put a QR code on each product instead of a barcode.

The QR code can provide a lot of information.

## APP TO MANAGE THE WEDDING

A wedding is an important event and requires comprehensive management to ensure that every aspect is under control. It would be beneficial to involve suppliers for each sector: flowers, clothing, catering.

## PARKING MANAGEMENT WITH LICENSE PLATE READER

We thought to create an application to manage the car in the parking.

Through a portal, users can choose the day they want to access the parking space, enter their information, license plate, and pay. The license plates acquired by the system, after payment, will be sent to the hardware that will recognize the license plate using a camera and allows cars to enter and exit.

## WE WOULD LIKE TO MAKE WEB APPLICATIONS

### PROJECT FOR THE SPORT

We thought to create an application to manage the result in real time for each kind of sport.

In the past we had try to manage the result of some artistic gymnastics competition.

<https://risultati.ginnasticavictoria.it/gara/187>

In our idea it was beautiful to put also webcam in different points and manage this webcam by showing in realtime and in streaming the situation of points and ranking... the artificial intelligence can be used to recognize the person and tell something about the player as soon as he/she is shown in the camera.

### BEACH UMBRELLA MANAGEMENT

We thought to create an application to manage umbrella in the beach and set in each umbrellas a QR CODE. The QR CODE can be usefull for the client to order food and drink without call the waiter and send the order directly to the kitchen.

### QUEUE MANAGEMENT

An application for managing queues in medical offices, pharmacies, supermarkets, markets, shops, ice cream parlors, and public offices to improve the user experience. A number is assigned to the person waiting for your call and the situation can be shown on maxi-screens to check the situation of the queue, the time to wait, etc..

# WE ARE READY TO OFFER YOU THE BEST SOLUTION
